Pressure controlled battery backpack sprayer new with CAS system: High-performance, versatile, ergonomic

The well-proven concept of controlling the pressure by electronics has been complemented by the cross-manufacturer battery pack system. The quick-change system of the CAS battery pack enables uninterrupted working. The spraying pressure can be adjusted optimally with an application controller. Everything is monitored and controlled by the electronics: constant pressure, on, off, pump protection functions and battery charge state. No control wires in the trigger valve, therefore less prone to faults. The Birchmeier accessories can be used to their full extent.

Real work comfort!

- Consistent spray pattern
- Drop size adjustable
- Re-defined ergonomics
- Hose outlet in front
- Click belt system
- Quick-change system for battery pack
